New Market Launches Trader Applications

Applications from businesses looking to trade at Chester's new indoor market will be open from Wednesday 20th January.

The vision for the new market is to be a 'modern traditional market' to build on the rejuvenation of the existing market. Applications are welcomed from any produce, goods, food or beverage traders.

All the current market's existing traders are being actively encouraged and supported to apply and make the transition to the new market. Details of how to apply and receive the application pack are available at: www.newchester.market/trade

The closing date for applications is 31st March 2021, however early applications are encouraged as demand for stalls is expected to be high. Anyone wishing to discuss further this opportunity should contact the market letting agents Barker Proudlove: jessica@barkerproudlove.co.uk

A trader selection panel will review each application using an equitable scoring process and may invite short-listed applicants for interview before making their final selection.

The new market is due to open in summer 2022, at the heart of the Northgate development, a short distance from its current home in the Forum Shopping Centre.

Latest interior visualisations

We can now reveal how the market's interior design is progressing, ahead of their launch to the media, also on 20th.

Above and below, these show the current work in progress for the entrance area above, and the central atrium food and beverage seating area.
